SKILL SET

Java		JavaScript	
Python		HTML/CSS	
Unix		AWS	
DataDog		Latex	
Git		Kafka	
SQL		React	

EXPERIENCE

3/2023 – Present
New York, NY

Senior Software Engineer

FanDuel

Working with FanDuel's teams in Europe, as well as Flutter's Cross Product Promotion (CPP) developers to offer greater generosity benefits for FanDuel users, opening up more promotion options for more products.

Working on the backend functionality for the new Picks product.

Drove efforts to make our microservices and backend more resilient, including redesigning and splitting up already existing services.

Continued working with WorldWinner to refine Faceoff and add new features to it, including prohibiting specific games based off the user's location, and crediting bonus Sportsbook bets to Faceoff users.

Worked on new features to improve the Daily Fantasy Sports experience for users, for example allowing for more flexible rewarding.

Worked on redesigning the backend infrastructure for Faceoff, including designing, creating, and developing the Beat The Pros for Faceoff, helping increase usage of the app.

Java / Python / DataDog / SQL / Unix / AWS

11/2020 – 3/2023
New York, NY

Software Engineer

FanDuel

Worked with various teams within FanDuel (and external companies Globo and BtoBet) to develop the backend needed for Cartola FC, a sports betting platform for Brazil's Serie A and for the World Cup.

Worked with external company WorldWinner (formerly known as GameTaco) to develop the Faceoff app, which blends FanDuel's sports betting platform with WorldWinner's games.

Mentored co-workers, worked on company-wide initiatives to improve things like monitoring, and interviewed prospective software engineers at FanDuel.

Was heavily involved in Operational Excellence and oncall tasks, whether it was for a special event, or a product release. Worked to improve stability of FanDuel's backend services.

Java / Python / DataDog / SQL / Unix / AWS

07/2019 – 06/2020 **Software Engineer**
Santa Clara, CA

Amazon

Updated Alexa's reminder service to help users differentiate between various types of reminders.

Coordinated and drove the effort to refine the scripts used by Alexa for reminders for better translation. This was especially important due to the release of Alexa in Brazil.

Assisted on occasion in the effort to create the Tell Me When feature.

Java / JavaScript / Spring Boot / Git / Unix

09/2017 – 05/2019 **Digital Projects Assistant**
Philadelphia, PA

University of Pennsylvania Digital Scholarship Program

Worked with the University of Pennsylvania Digital Scholarship Program to help design and edit software for various classes and departments at the University of Pennsylvania.

PHP / Python / Unix

05/2018 – 08/2018 **Software Development Engineering Intern**
Santa Clara, CA

Amazon

Worked with the Alexa Alarms team to develop a new feature to send push notifications to a user's phone, allowing them to turn off alarms from their phone rather than directly on the device.

Java / Git / Unix / JavaScript / React

09/2017 – 05/2019 **Intern**
Philadelphia, PA

University of Pennsylvania Digital Scholarship Program

Increased functionality in and helped redesigned Scalar for use in various courses, including adding automatic PDF conversion, automatic generation of books for journals, and facilitating peer reviews.

Improved functionality in the Open Richly Annotated Cuneiform Corpus (ORACC), including adding a user registration feature, improving server functionality, and adding features used in the GUI for ORACC. This helped facilitate transliteration of cuneiform tablets.

PHP / Python / Unix / JavaScript

EDUCATION

2015 – 2019
GPA: 3.45

Bachelor's Degree
Member - Pi Sigma Alpha

University of Pennsylvania
